

## The product advantages

All enclosure components can be completely latched without the use of tools. At the same time, protection class IP65 can be achieved with the use of an optional seal set.

With sizes 555, 655 and 865, definable access protection can be achieved by use of the caps: Tool opening, manual opening, or blocking.

Snap-on caps which can function as an enclosure cover are available in 6 colours and 1 infrared-permissive version. Colour combinations are also possible.

Versions with fitted battery compartments BE 30 (9V block or 2 mignon batteries) or BE 60 (2 9V block or 4 mignon batteries) are available on request for sizes 555, 655 and 865.

All sizes are available with a continuous membrane keypad area; 4 sizes additionally with display opening including a non-scratch window.
